Sathyajith K

Python Developer

+91-9159042060 sathyajithkannanv@gmail.com linkedin.com/in/sathyajith1322

Summary

Computer Science Engineering graduate with strong knowledge of Python programming, machine learning, natural language processing, data analysis, and web application development. Hands-on experience building Python-based projects using Scikit-learn, Pandas, TensorFlow, Flask, and Streamlit. Seeking an entry-level Python Developer role to apply programming, problem-solving, and software development skills in a professional environment.

Skills

Programming & Querying: Python, SQL
Web Technologies: HTML5, CSS3
Libraries & Frameworks: Scikit-learn, Pandas, TensorFlow, Flask, Streamlit
Machine Learning & Data: Machine Learning, Natural Language Processing (NLP), Data Analysis
Database: MySQL
Version Control & Tools: Git, GitHub, VS Code

Projects

Fake News Detection System | *Python, Scikit-learn, Pandas, NLP, Flask, Streamlit*

- Developed a machine learning-based application to classify news articles as **fake or real** using Natural Language Processing (NLP) techniques.
- Implemented text preprocessing and feature extraction techniques to transform unstructured news content into machine learning-ready data.
- Applied Scikit-learn classification models to train and evaluate the fake news detection system.
- Integrated the machine learning workflow with Flask and Streamlit to provide an interactive interface for making predictions.

Sentiment Analysis of ChatGPT Reviews | *Python, Scikit-learn, Pandas, NLP, Flask, Streamlit*

- Built an end-to-end Natural Language Processing application to classify ChatGPT reviews into **positive, neutral, and negative** sentiment categories.
- Performed text preprocessing and feature extraction using Python and Scikit-learn for sentiment classification.
- Used Pandas for data processing and analysis of review datasets.
- Designed visualizations to present sentiment distribution and analysis results.

AI-Based Crime Pattern Forecasting System | *Python, TensorFlow, Flask*

- Developed a Flask-based web application to forecast crime rate and crime status based on user-selected input parameters.
- Applied TensorFlow-based machine learning models to analyze crime data patterns and generate predictive insights.
- Integrated the machine learning model with the Flask application to provide predictions through a web-based interface.

Awards & Certifications

- **Kaggle Python Course:** Completed a hands-on Python programming course covering Python fundamentals, functions, data structures, and core programming concepts.
- **Kaggle - Intro to Machine Learning:** Completed a hands-on machine learning course covering supervised learning, model training, validation, and predictive modeling using Python.

Education

B.E. Computer Science Engineering — **Graduated: 2026**
Dhanalakshmi Srinivasan College of Engineering and Technology, Mamallapuram — *Percentage: 75%*

Higher Secondary Education — **2020 – 2022**
CSI Higher Secondary School, Nagapattinam — *Percentage: 66.33%*
